Show Less Bullet Power is the first - a man who shoots for Android devices that focuses on multiplayer battles. The game is largely similar to a counter-strike. In addition to the classic modes of fighting between the two fighting parties there and the single player campaign where you have to fulfill a number of missions, mainly focused on the Negev and the position of enemies. There is also a quick game mode where you can train with bots before shooting with real players. Pleased with a good arsenal of weapons presented. The player can pick up a gun to his liking. You can choose from a variety of guns, pistols, sniper rifles, shotguns. The control is perfectly implemented due to the custom size and order of the virtual keys. The graphics did well, but there are some rough edges in front of clumsy animations of opponents' moves, fuzzy texture and slightly angular areas on the game map. But the sound is pleasing to realistic effects of shooting and explosions. Bullet Power - a good online-thriller, which will attract fans of virtual battles.
